

On behalf of our customer, a Swiss affiliate of a global pharmaceutical company with location in Central Switzerland, we are looking for an experienced

Country Safety Lead

The purpose of this role is to ensure effective compliance & human safety surveillance related to pharmaceutical products.

Your main responsibilities:

- You are leading the Pharmacovigilance & Medical Information Teams
- You have the responsibility for the affiliate PV system
- You ensure compliance with local and global safety regulations as required by local and regional health authorities
- You are the main contact for local and global functions in regard to Pharmacovigilance and Medical Information
- You are responsible for the internal PV audits and inspections
- You have budget responsibility

Your profile:

- You have a medical degree or a scientific degree in a relevant field (pharmacy, biology) with at least 5 years of experience in PV
- Good knowledge of Swiss pharmacovigilance legal environment and international regulations
- You worked within an international company with complex organizational structures, with pharmacovigilance systems and safety related product management
- You are an experienced leader with a motivating leadership style
- Capacity to work under pressure: You have a sense of urgency and excellent problem solving skills, especially with respect to enforcing safety rules and global procedures as described in Quality Documents, Operational Manuals and Guidance documents
- You are fluent in German and English and good knowledge of French
