

On behalf of our customer, a leading European specialist pharmaceutical company with a strong global network of partnerships and location in Central Switzerland, we are looking for an experienced

## **Medical Scientific Liaison Switzerland**

In this role your primary tasks will be developing scientific relationships with relevant KOLs, assessing the market access challenges and identifying key success factors which will be needed to make the products a success in Switzerland.

### **Main responsibilities:**

- You develop peer to peer scientific relationships, assess advocacy and contribute and respond to unsolicited requests for scientific information using approved, non-promotional materials with Medical Experts( Key Stakeholders, Health Care Professionals HCPs)
- You build and develop effective relationships with key opinion leaders in line with local strategy
- You provide and discuss scientific information and data with HCPs to ensure quality and accuracy of medical and scientific information on new treatment options and selected areas of therapeutic interest
- You liaise and provide up-to-date medical support to relevant external groups to ensure evidence based understanding of products relative to medical guidelines, and health economic information.
- You participate and collaborate with interdisciplinary and international project teams
- You provide scientific educational activities to support study accrual for key trials as appropriate
- You prepare feasibility and research site recommendation of company sponsored clinical trials
- You provide medical input for regulatory submissions and market access
- You give medical support and trainings internally

### **Your competences:**

- You have excellent presentation, negotiation and communication skills
- You are able to quickly build up professional relationships and manage KOLs with competence
- You align your activities with the marketing strategy and manage projects autonomously and must be able to adapt, organize, prioritize and work effectively in a constantly changing field-based environment
- You have strong personal integrity and customer focus and able to effectively contribute and work on multifunctional teams

### **Your profile:**

- You have a medical degree or a scientific degree in human medicine, pharmacy biology or biochemistry and with solid medical/technical background, clinical research in-sight plus business and market knowledge
- Willingness to travel within Switzerland and Austria
- Languages: Fluency in German, English and French and Italian a plus
